

Hutsko Artem Viktorovich

Male, 26 years old, born on 28 April 1994

+375 (33) 673-56-99 (Viber, Telegram)

wkart94@gmail.com

Junior software testing engineer

- C# (basic)
- Python (basic)
- SQL (SELECT, JOIN, LIKE, etc.)
- HTML (basic)
- Git (init, add, commit, pull, fetch)
- OSI (TCP/IP, UDP, 7 layers)
- HTTP (message, response codes, methods)
- DevTools (elements, network, console, performance)
- Test Case Design (Boundary Value Analysis, Equivalence Partitioning, State-Transition Diagrams, Pairwise Testing)
- Linux (user experience, installation, folder/file operations, access permissions)

<https://github.com/artVG>

About: Knowledge of main WEB protocols and app architectures (MVC) gives me possibility to understand where most destructive bug could occur.

Main functional testing techniques have much in common with modelling in economics, so it was not hard for me to understand how to use them.

One of the main things I've understood in the process of studying software testing is that because of resource limitations (economics) all tests must depend on statistically common cases, sanity and automation where it's possible.

Languages: Russian (Native), English (Upper Intermediate)

Work experience: 3 years 7 months (June 2017 - January 2021)

Baranovichi Reinforced Concrete Factory	zhelezobeton.by
Sales department: Operator (ERP Galaktika), Economist	
CMR, Invoices, other shipping documents
